AI Engineer | Applied AI, RAG & ML Systems

PROFESSIONAL SUMMARY:

- 3+ years in AI & digitalization: architected and deployed cloud-native ML pipelines, achieving 95% prediction accuracy and reducing forecasting errors by 15%.
- Process industrialization expert: built RAG workflows and parser solutions, boosting recommendation accuracy by 20% and cutting manual classification time by 70%.
- Leader in automation & enablement: containerized end-to-end workflows in Docker/Streamlit and led workshops for 20+ participants, accelerating deployment velocity by 50%.

EXPERIENCE

AI Engineer | Harmix Group

10/2025 – 08/2026

Built and shipped the Proactive AI Manager platform (pam.harmix.ai): architected FastAPI/Cloud Run backend services, MCP servers and tools, and an in-production agent runtime; delivered end-to-end AI client integrations for Qsamruk (CV screening and AI interviews scored with Gemini) and Euroformat (elevator BOM/spec engine exposed as an MCP tool).

Junior Data Scientist | Troople

10/2024 – 01/2025 (PART-TIME, ALONGSIDE STUDIES)

Executed and delivered various data science projects for Troople clients, utilizing my expertise in data science and cloud computing, with a primary focus on developing advanced recommendation systems (OmniParser, advanced RAG).

Data Scientist Intern | akkanto

09/2024-02/2025

Developed and deployed a web application on Azure to automate internal processes using AI technologies, with a strong focus on ensuring data security.

Data Science Bootcamp | BeCode

2023-2024

Built end-to-end ML projects: a property-price prediction app from web-scraped data, a tariff-change forecasting pipeline, and a brand-guided image-generation tool; delivered a client analytics project with Accenture in Tableau.

Earlier experience: Marketing Specialist, TipTape · Arduino Tutor, Ukrainian Voice · Project Manager, Promote Ukraine ([EBB](#) project)

EDUCATION:

BS Engineering Technology & Robotics | KU Leuven

BS Business Economics & Technologies | Vrije Universiteit Brussel

MBA in Data Science & AI Management | Paris University of International Education

SKILLS:

- Data Manipulation, Querying, and Analysis: Python, SQL, R, Bash, Git
- Machine Learning, Image/Video Analysis, and Text Processing:
 - scikit-learn, MLflow, Hugging Face, spaCy, OpenCV, YOLO, TensorFlow, Keras;
- Data visualization: Tableau, Power BI;
- Cloud computing: AWS, Azure, GCP, DigitalOcean, Railway, Render;
- Reproducible environments and web apps: Docker, Kubernetes, Streamlit, Gradio;
- Data processing and visualization: Pandas, NumPy, Matplotlib;
- Web development and UI design: Django, FastAPI, Flask, JavaScript, HTML, CSS, React.
- Design & 3D prototyping: Figma, Fusion 360.
- Soft skills: Problem-solving & Critical Thinking, Communication & Storytelling, Teamwork & Collaboration

LANGUAGES:

English | C1
French | B1
Ukrainian | Native
Russian | Native

CERTIFICATIONS:

- Azure Data Scientist Associate – [DP100](#)
- AWS Certified Cloud Practitioner – [CLF-C02](#)
